PREFACE.

THE AMERICAN SPELLING BOOK, or First Part of a Grammatical Institute of the English language, when first published, encountered an opposition, which few new publications have sustained with success. It however maintained its ground, and its reputation has been gradually extended and established, until it has become the principal elementary book in the United States. In a great part of the northern States, it is the only book of the kind used ; it is much used in the middle and southern States ; and its annual sales indicate a large and increasing demand. Its merit is evinced not only by this general use, but by a remarkable fact, that, in many attempts made to rival it, the compilers have all constructed their works on a similar plan ; some of them have most unwarrantably and illegally copied a considerable part of the tables, with little or no alteration ; and others have altered them, by additions, mutilations and subdivisions, numerous and perplexing. In most instances, this species of injustice has been discountenanced by the citizens of the United States, and the public sentiment has protected the original work, more effectually than the penalties of the law.*

* The sales of the *American Spelling Book*, since its first publication, amount to more than TWO MILLIONS of copies, and they are annually increasing. One great advantage experienced in using this work is the simplicity of the scheme of pronunciation, which exhibits the sounds of the letters, with sufficient accuracy, without a mark over each vowel. The multitude of characters in Perry's scheme render it far too complex and perplexing to be useful to children, confusing the eye, without enlightening the understanding. Nor is there the least necessity for a figure over each vowel, as in Walker, Sheridan, and other authors. In nine-tenths of the words in our language, a correct pronunciation is better taught by a natural division of the syllables, and a direction for placing the accent, than by a minute and endless repetition of characters.

Gratitude to the public, as well as a desire to furnish schools with a more complete and well digested system of elements, has induced me to embrace the opportunity when the first patent expires, to revise the work, and give it all the improvement which the experience of many teachers, and my own observations and reflections have suggested. In the execution of this design, care has been taken to preserve the scheme of pronunciation; and the substance of the former work. Most of the tables, having stood the test of experience, are considered as susceptible of little improvement or amendment—A few alterations are made, with a view to accommodate the work to the most accurate rules of pronunciation, and most general usage of speaking; as also to correct some errors which had crept into the work. A perfect standard of pronunciation, in a living language, is not to be expected; and when the best English Dictionaries differ from each other, in several hundred, probably a thousand words, where are we to seek for undisputed rules? and how can we arrive at perfect uniformity?

The rules respecting accent, prefixed to the former work, are found to be too lengthy and complex, to answer any valuable purpose in a work intended for children; they are therefore omitted. The geographical tables are thrown into a different form; and the abridgment of grammar is omitted. Geography and Grammar are sciences that require distinct treatises, and schools are furnished with them in abundance. It is believed to be more useful to confine this work to its proper objects,—the teaching of the first elements of the language, spelling and reading. On this subject, the opinion of many judicious persons concurs with my own.

The improvements made in this work, chiefly consist in a great number of new tables. Some of them are intended to exhibit the manner in which derivative words, and the variations of nouns, adjectives and verbs, are formed. The examples of this sort cannot fail to be very useful; as children, who may be well acquainted with a word in the singular number, or positive degree, may be perplexed when they see it in the plural number, or comparative form. The examples of derivation, will ac-

custom youth to observe the manner, in which various branches spring from one radical word, and thus lead their minds to some knowledge of the formation of the language, and the manner in which syllables are added or prefixed to vary the sense of words.

In the familiar lessons for reading, care has been taken to express ideas in plain, but not in vulgar language; and to combine, with the familiarity of objects, useful truth and practical principles.

In a copious list of names of places, rivers, lakes, mountains, &c. which are introduced into this work, no labor has been spared to exhibit their just orthography and pronunciation, according to the analogies of our language, and the common usages of the country. The orthography of Indian names has not, in every instance, been well adjusted by American authors. Many of these names still retain the French orthography, found in the writings of the first discoverers or early travellers; but the practice of writing such words in the French manner ought to be discountenanced. How does an unlettered American know the pronunciation of the names, *ouïscousin* or *ouabasche*, in this French dress? Would he suspect the pronunciation to be *Wisconsin* and *Waubosh*? Our citizens ought not to be thus perplexed with an orthography to which they are strangers. Nor ought the harsh guttural sounds of the natives to be retained in such words as *Shawangunk*, and many others. Where popular practice has softened and abridged words of this kind, the change has been made in conformity with the genius of our language, which is accommodated to a civilized people; and the orthography ought to be conformed to the practice of speaking. The true pronunciation of the name of a place, is that which prevails in and near the place.—I have always sought for this, but am apprehensive, that, in some instances, my information may not be correct. It has however been my endeavor to give the true pronunciation, in the appropriate English characters.

The importance of correctness and uniformity, in the several impressions of a book of such general use, has suggested the propriety of adopting effectual measures

to insure these desirable objects ; and it is believed that such measures are taken, as will render all the future impressions of this work, uniform in the pages, well executed, and perfectly correct.

In the progress of society and improvement, some gradual changes must be expected in a living language ; and corresponding alterations in elementary books of instruction, become indispensable : but it is desirable that these alterations should be as few as possible, for they occasion uncertainty and inconvenience. And although perfect uniformity in speaking, is not probably attainable in any living language, yet it is to be wished, that the youth of our country may be, as little as possible, perplexed with various differing systems and standards. Whatever may be the difference of opinion, among individuals, respecting a few particular words, or the particular arrangement of a few classes of words, the general interest of education requires, that a disposition to multiply books and systems for teaching the language of the country, should not be indulged to an unlimited extent. On this disposition however, the public sentiment alone can impose restraint.

As the first part of the Institute met with the general approbation of my fellow citizens, it is presumed the labor bestowed upon this work, in correcting and improving the system, will render it still more acceptable to the public, by facilitating the education of youth, and enabling teachers to instil into their minds, with the first rudiments of the language, some just ideas of religion, morals and domestic economy.

ANALYSIS OF SOUNDS

IN THE

ENGLISH LANGUAGE:

LANGUAGE, in its more limited sense, is the expression of ideas by articulate sounds. In a more general sense, the word denotes all sounds by which animals express their feelings, in such a manner as to be understood by their own species.

Articulate sounds are those which are formed by the human voice, in pronouncing letters, syllables and words, and constitute the *spoken* language, which is addressed to the *ear*. Letters are the marks of sounds, and the first elements of *written* language, which is presented to the *eye*.

In a perfect language, every simple sound would be expressed by a distinct character; and no character would have more than one sound. But languages are not thus perfect; and the English Language, in particular, is, in these respects, extremely irregular.

The letters used in writing, when arranged in a certain customary order, compose what is called an *Alphabet*.

The English Alphabet consists of twenty six letters, or single characters; and for want of others, certain simple sounds are represented by two letters united.

The letters or single characters are, a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z. The compound characters representing distinct sounds are, ch, sh, th. There is also a distinct sound expressed by *ng*, as in *long*; and another by *s* or *z*, as in *fusion*, *azure*, which sound might be represented by *zh*.

Letters are of two kinds, *vowels* and *consonants*.

A vowel is a simple articulate sound, formed without the help of another letter, by opening the mouth in a particular manner, and begun and completed with the same position of the organs; as, *a, e, o*. The letters which represent these sounds are six; *a, e, i, o, u, y*. But each of these characters is used to express two or more sounds.

The following are the vowel sounds in the English Language—of *a*, as in late, ask, ball, hat, what.

of *e*, in mete, met.

of *i*, in find, pit.

of *o*, in note, not, move.

of *u*, in truth, but, bash.

of *y*, in chyle, pity.

The vowels have a long and a short sound, or quantity; and the different quantities are represented by different letters. Thus.

Long	{	<i>a</i> , in late,	{	when shortened,	} by <i>e</i> , as in let.	
		<i>ee</i> , in feet,	}	is expressed		
		<i>oo</i> , in pool,				by <i>i</i> , in fit, & <i>y</i> in pity.
		<i>a</i> , in hall,				by <i>u</i> , in pull & <i>oo</i> in wool. by <i>o</i> , in holly and <i>a</i> in wallow.

That the sounds of *a* in *late* and *e* in *let* are only a modification of the same vowel, may be easily understood by attending to the manner of forming the sounds; for in both words, the aperture of the mouth and the configuration of the organs are the same. This circumstance proves the sameness of the sound or vowel, in the two words, though differing in time or quantity.

A consonant is a letter which has no sound, or an imperfect one, without the help of a vowel. The consonants which are entirely silent, interrupt the voice by closing the organs; as *b*, *d*, *g* hard, *k*, *p*, *t*, which are called *mutes*; as in *eb*, *ed*, *eg*, *ek*, *ep*, et.

The consonants which do not entirely interrupt all sound by closing the organs, are *f*, *l*, *m*, *n*, *r*, *s*, *v*, *z*, which are all half vowels or semi-vowels.—To these may be added the sounds of *sh*, *th*, *zh*, and *ng*, in *esh*, *eth*, *ezh*, *ing*, which our language has no single characters to express.

A diphthong is the union of two simple sounds uttered in one breath or articulation. The two sounds do not strictly form one; for there are two different positions of the organs, and two distinct sounds; but the transition from one to the other is so rapid, that the distinction is scarcely perceived, and the sound is therefore considered as compound. Diphthongal sounds are sometimes ex-

presented by two letters, as in *voice, joy*, and sometimes by one, as in *defy*; the sound of *y*, in the latter word, if prolonged, terminates in *e*, and is really diphthongal.

A triphthong is a union of three vowels in a syllable; but it may be questioned whether in any English word, we pronounce three vowels in a single articulation. In the word *adieu*, the three vowels are not distinctly sounded.

B has but one sound, as in *bite*.

C is always sounded like *k* or *s*—like *k*, before *a, o* and *u*—and like *s* before *e, i* and *y*. Thus.

ca, ce, ci, co, cu, cy,

ka, se, si, ko, ku, sy.

At the end of words it is always hard like *k*, as in *pub-lic*. When followed by *i* or *e* before a vowel, the syllable slides into the sound of *sh*; as in *cetaceous, gracious, social*, which are pronounced *cetashus, grashus, soshal*.

D has only one sound, as in *dress, bold*.

F has its own proper sound, as in *life, fever*, except in *of*, where it has the sound of *v*.

G before *a, o*, and *u* has always its hard sound, as in *gave, go, gun*.

Before *e, i* and *y* it has the same hard sound in some words, and in others, the sound of *j*. But these varieties are incapable of being reduced to any general rule, and are to be learnt only by practice, observation, and a dictionary, in which the sounds are designated.

H can hardly be said to have any sound, but it denotes an aspiration or impulse of breath, which modifies the sound of the following vowel, as in *heart, heave*.

I is a vowel, as in *fit*; or a consonant as in *bullion*.

J is the mark of a compound sound, or union of sounds, which may be represented by *dzh*, or the soft *g*, as in *jelly*.

K has but one sound, as in *king*; and before *n* is always silent, as in *know*.

L has but one sound, as in *lame*. It is silent before *k*, as in *walk*.

10 *An Easy Standard of Pronunciation.*

M has but one sound, as in man ; and is never silent.

N has but one sound, as in not, and is silent after *as* in hymn.

P has one uniform sound, as in pit.

Q has the power of *k*, and is always followed by *u*, as, in question.

R has one sound only, as in barrel.

S has the sound of *c*, as in *so* ; of *z* as in *rose*—and when followed by *i* preceding a vowel, the syllable has the sound of *sh*, as in *mission* ; or *zh*, as in *osier*.

T has its proper sound, as in *turn*, at the beginning of words and end of syllables. In all terminations in *tion*, and *tial*, *ti*, have the sound of *sh*, as in *nation*, *nuptial* ; except when preceded by *s* or *x*, in which cases they have the sound of *ch*, as in *question*, *mixtion*.

U has the properties of a consonant and vowel, in *union*, *unanimity*, &c.

V has uniformly one sound, as in *voice*, *live*, and is never silent

W has the power of a vowel, as in *dwel* ; or a consonant, as in *well*, *will*.

X has the sound of *ks*, as in *wax* ; or of *gz*, as in *exit*, and in other words, when followed by an accented syllable beginning with a vowel. In the beginning of Greek names, it has the sound of *z*, as in *Xerxes*, *Xenophon*.

Y is a vowel, as in *vanity* ; a diphthong, as in *defy* ; or a consonant, as in *young*.

Z has its own sound usually, as in *zeal*, *freeze*.

Ch have the sound of *tsh* in words of English origin, as in *chip*—in some words of French original, they have the sound of *sh*, as in *machine*—and some words of Greek origin, the sound of *k*, as in *chorus*.

Gh have the sound of *f*, as in *laugh*, or are silent, as in *light*.

Ph have the sound of *f*, as in Philosophy; except in Stephen, where the sound is that of *v*.

Ng have a nasal sound, as in sing; but when *e* follows the latter takes the sound of *j*, as in range. In the words, longer, stronger, younger, the sound of the *g* is doubled, and the last syllable is sounded as if written long-ger, &c.

Sh has one sound only, as in shell; but its use is often supplied by *si*, *ci*, and *ce*, before a vowel, as in motion, gracious, cetaceous.

Th has two sounds, aspirate and vocal—*aspirate*, as in think, bath—*vocal*, as in those, that, bathe.

Sc before *a*, *o*, *u* and *r*, are pronounced like *sk*, as in scale scoff, sculpture, scribble: before *e*, *i*, *y*, like soft *c*, or *s*, as in scene, sceptic, science, scythia: Thus pronounced,

sca, sce, sci, sco, scu, scy.

ska, se, si, sko, sku, sy.

Formation of Words and Sentences.

Letters form syllables; syllables form words, and words form sentences, which compose a discourse.

A syllable is a letter or a union of letters, which can be uttered at one impulse of voice.

A word of one syllable is called a monosyllable.

of two syllables

a dissyllable.

of three syllables

a trissyllable.

of many syllables

a polysyllable.

Of Accent, Emphasis, and Cadence.

Accent is a forcible stress or impulse of voice on a letter or syllable, distinguishing it from others in the same word. When it falls on a vowel, it prolongs the sound, as in glory; when it falls on a consonant, the preceding vowel is short, as in habit.

The general rule by which accent is regulated, is, that the stress of voice falls on that syllable of a word, which renders the articulation most easy to the speaker, and

12 *An Easy Standard of Pronunciation.*

most agreeable to the hearer—By this rule has the accent of most words been imperceptibly established by long and universal consent.

When a word consists of three or more syllables the ease of speaking requires usually a secondary accent, of less forcible utterance than the primary, but clearly distinguishable from the pronunciation of unaccented syllables; as superfluity, literary.

In many compound words, the parts of which are important words of themselves, there is very little distinction of accent, as ink-stand, church-yard.

Emphasis, is a particular force of utterance given to a particular word in a sentence, on account of its importance.

Cadence is a fall or modulation of the voice in reading or speaking, especially at the end of a sentence.

Words are simple or compound, primitive or derivative.

A simple word cannot be divided, without destroying the sense: as man, child, house, charity, faith.

A compound word is formed by two or more words; as chimney-piece, book-binder.

Primitive words are such as are not derived, but constitute a radical stock from which others are formed; as grace, hope, charm.

Derivative words are those which are formed of a primitive, and some termination or additional syllable; as grace-less, hope-ful, charm-ing, un-welcome.

Spelling is the art or practice of writing or reading the proper letters of a word; called also orthography. In forming tables for learners, the best rule to be observed, is, to divide the syllables in such a manner as to guide the learner by the sound of the letters, to the sound of the words; that is, to divide them as they are divided in a just pronunciation.

EXPLANATION OF THE KEY.

A figure stands as the invariable representative of a certain sound. The figure 1 represents the long sound of the letters, *a, e, i, o, u,* or *ew,* and *y*; number 2, the short sound of the same characters; number 3, marks the sound of broad *a*, as in *hall*; number 4, represents the sound of *a*, in *father*; number 5, represents the short sound of broad *a*, as in *not, what*; number 6, represents the sound of *o* in *move*, commonly expressed *oo*; number 7, represents the short sound of *oo* in *root, bush*; number 8, represents the sound of *u* short, made by *e, i,*

and *o*, as in *her, bird, come*, pronounced *hur, burd cum*; number 9, represents the first sound of *a* made by *e*, as in *their, vein*, pronounced *thare, vane*; number 10, represents the French sound of *i*, which is the same as *e* long.

The sounds of the diphthongs *oi* and *ou* are not represented by figures; these have one invariable sound, and are placed before the words where they occur in the tables.

Silent letters are printed in Italic characters. Thus, in *head, goal, build, people, fight*, the Italic letters have no sound.

S, when printed in Italic, is not silent, but pronounced like *z*, as in *devise*, pronounced *devize*.

The letter *e* at the end of words of more syllables than one, is almost always silent: but serves often to lengthen a foregoing vowel, as in *bid, bide*; to soften *c*, as in *notice*; or to soften *g*, as in *homage*; or to change the sound of *th* from the first to the second, as in *bath, bathe*. In the following work, when *e* final lengthens the foregoing vowel, that is, gives it its first sound, it is printed in a Roman character, as in *fate*; but in all other cases it is printed in Italic, except in table 39.

Ch have the English sound, as in *charm*; except in the 38th and 39th tables.

The sounds of *th* in *this* and *thou*, are all distinguished in the 12th and 37th tables; except in numeral adjectives.

The sound of *aw* is invariably that of broad *a*, and that of *ew* nearly the same as *u* long.

N. B. Although one character is sufficient to express a simple sound, yet the combinations *ee, aw, ew, oo*, are so well known to express certain sounds, that it was judged best to print both letters in Roman characters. *Ck* and *ss* are also printed in Roman characters, though one alone would be sufficient to express the sound.

TABLE IV.

Easy words of two syllables, accented on the first.

When the stress of voice falls on a vowel, it is necessarily long, and is marked by the figure 1. When the stress of voice falls on a consonant, the preceding vowel is necessarily short, and is marked by figure 2.

No figures are placed over the vowels in unaccented syllables, because they are short. It must be observed, however, that in unaccented terminating syllables, almost all vowels are pronounced like *i* and *u* short. Thus,

al is pronounced ul, rural rurul,
et it, fillet fillit.

This is the general rule in the language; originating doubtless from this cause, that short *i* and *u* are pronounced with a less aperture or opening of the mouth, with less exertions of the organs, and consequently with more ease than the other vowels in these terminating syllables; for in order to pronounce them right, nothing more is requisite than to lay a proper stress of the voice on the accented syllable, and pronounce the unaccented syllables with more ease and rapidity. When any of these terminations are accented, as some of them are, the vowel retains its own sound; as, *compel, lament, depress, &c.*

The figures are placed over the vowels of the accented syllables; and one figure marks all the words that follow, till it is contradicted by another figure.

TABLE V.

Easy words of two syllables, accented on the second.

N. B. In general, when a vowel in an unaccented syllable, stands alone or ends a syllable, it has its first sound, as in *protect*; yet as we do not dwell upon the vowel, it is short and weak. When the vowel, in such syllables, is joined to a consonant, it has its second sound, as *address*.

* But if a vowel unaccented ends the word, it has its second sound, as, in *city*.

☞ Having proceeded through tables, composed of easy words from one to four syllables, let the learner begin the following tables, which consist of more difficult words. In these the child will be much assisted by a knowledge of the figures and the use of the Italics.

If the instructor should think it useful to let his pupils read some of the easy lessons, before they have finished spelling, he may divide their studies—let them spell one part of the day, and read the other.

A similar remark applies to *a* in *bar*.

MONOSYLLABLES IN TH.

The following have the first sound of th, viz. as in thick, thin.

Thrów	thowl	hath	breadth	bath
truth	threw	rath	filth	lath
youth	thrice	pith	frith	wrath
sheath	thrive	with*	plinth	thrób

quoth	death	stealth	warmth	ou
ruth	health	thrash	swath	south
teeth	wealth	depth	páth	mouth
thane	threat	width	hearth	drouth

* In this word, *th* has its first sound before a consonant, as in *withstand*; and its second sound before a vowel, as in *without*, *with us*. But in other compound words, *th* generally retains the sound of its primitive.

The following have the second sound of th, as in thou.

Thine	teeth*	blithe	then	soothe
thy	those	wreath	thus	they
bathe	tithe	writhe	the	there
lathe	these	sythe	them	their
swathe	though	seethe	thence	ou
clothe	thee	breathe	than	thou
loathe	hithe	this	booth	mouth
meethe	lithe	that	smooth	

* The noun *teeth*, has the first sound of *tb*, and the verb to *teeth* its second sound. The same is observable of *mouth* and to *mouth*. This is the reason why these words are found under both heads.

The words *mouth*, *moth*, *cloth*, *oath*, *path*, *swath*, *batb*, *latb*, have the first sound of *tb* in the singular number, and the second in the plural.

TABLE XIII.

*Lessons of easy words, to teach children to read,
and to know their duty.*

LESSON I.

NO man may put off the law of God :
My joy is in his law all the day.
O may I not go in the way of sin !
Let me not go in the way of ill men.

II.

A bad man is a foe to the law ;
It is his joy to do ill.
All men go out of the way.
Who can say he has no sin ?

III.

The way of man is ill.
My son do as you are bid :
But if you are bid, do no ill.
See not my sin, and let me not go to the pit.

IV.

Rest in the Lord, and mind his word.
My son, hold fast the law that is good.
You must not tell a lie, nor do hurt.
We must let no man hurt us.

V.

Do as well as you can, and do no harm.
Mark the man that doth well, and do so too.
Help such as want help, and be kind.
Let your sins past put you in mind to mend.

VI.

I will not walk with bad men, that I may not
be cast off with them.
I will love the law and keep it.
I will walk with the just and do good.

VII.

This life is not long ; but the life to come has
no end.
We must pray for them that hate us,
We must love them that love not us.
We must do as we like to be done to.

VIII.

A bad life will make a bad end.
He must live well that will die well.
He doth live ill that doth not mend.
In time to come we must do no ill.

IX.

No man can say that he has done no ill.
For all men have gone out of the way.
There is none that doth good ; no not one.
If I have done harm, I must do it no more.

X.

Sin will lead us to pain and woe.
Love that which is good and shun vice.
Hate no man, but love both friends and foes.
A bad man can take no rest, day nor night.

XI.

He who came to save us, will wash us from all sin ; I will be glad in his name.

A good boy will do all that is just ; he will flee from vice ; he will do good, and walk in the way of life.

Love not the world, nor the things that are in the world ; for they are sin.

I will not fear what flesh can do to me ; for my trust is in him who made the world :

He is nigh to them that pray to him, and praise his name.

XII.

Be a good child ; mind your book ; love your school, and strive to learn.

Tell no tales ; call no ill names ; you must not lie, nor swear, nor cheat, nor steal.

Play not with bad boys ; use no ill words at play ; spend your time well ; live in peace, and shun all strife. This is the way to make good men love you, and save your soul from pain and woe.

XIII.

A good child will not lie, swear, nor steal. —He will be good at home, and ask to read his book ; when he gets up he will wash his hands and face clean ; he will comb his hair, and make haste to school ; he will not play by the way, as bad boys do.

XIV.

When good boys and girls are at school, they will mind their books, and try to learn to spell and read well, and not play in the time of school.

When they are at church, they will sit, kneel, or stand still; and when they are at home, will read some good book, that God may bless them.

XV.

As for those boys and girls that mind not their books, and love not the church and school, but play with such as tell tales, tell lies, curse, swear and steal, they will come to some bad end, and must be whipt till they mend their ways.

TABLE XV.

LESSON I.

THE time will come when we must all be laid in the dust.

Keep thy tongue from ill, and thy lips from guile. Let thy words be plain and true to the thoughts of the heart.

He that strives to vex or hurt those that sit next him, is a bad boy, and will meet with foes let him go where he will; but he that is kind, and loves to live in peace, will make friends of all that know him.

E

A clown will not make a bow, nor thank you when you give him what he wants ; but he that is well bred, will do both.

He that speaks loud in school will not learn his own book well, nor let the rest learn theirs ; but those that make no noise will soon be wise, and gain much love and good will.

II.

Shun the boy that tells lies, or speaks bad words ; for he would soon bring thee to shame.

He that does no harm shall gain the love of the whole school ; but he that strives to hurt the rest, shall gain their ill will.

He that lies in bed when he should go to school, is not wise ; but he that shakes off sleep shall have praise.

He is a fool that does not choose the best boys when he goes to play ; for bad boys will cheat, and lie, and swear, and strive to make him as bad as themselves.

Slight no man, for you know not how soon you may stand in need of his help.

III.

If you have done wrong, own your fault ; for he that tells a lie to hide it, makes it worse.

He that tells the truth is a wise child ; but he that tells lies, will not be heard when he speaks the truth.

When you are at school, make no noise, but keep your seat, and mind your book ; for what you learn will do you good, when you grow to be a man.

Play no tricks on them that sit next you ; for

If you do, good boys will shun you as they would a dog that they knew would bite them.

He that hurts you at the same time that he calls you his friend, is worse than a snake in the grass.

Be kind to all men, and hurt not thyself.

A wise child loves to learn his book, but the fool would choose to play with toys.

IV.

Sloth keeps such a hold of some boys, that they lie in bed when they should go to school; but a boy that wants to be wise will drive sleep far from him.

Love him that loves his book, and speaks good words, and does no harm: For such a friend may do thee good all the days of thy life.

Be kind to all as far as you can; you know not how soon you may want their help; and he that has the good will of all that know him shall not want a friend in time of need.

If you want to be good, wise and strong, read with care such books as have been made by wise and good men; think of what you read in your spare hours; be brisk at play, but do not swear; and waste not too much of your time in bed.

TABLE XVIII.

Familiar Lessons.

A Dog growls and barks ; a cat mews and purrs ; a cock crows ; a hen clucks and cackles ; a bird chirps and sings ; an ox lows ; a bull bellows ; a lion roars ; a horse neighs ; an ass

brays ; a whale spouts. Birds fly in the air by the help of wings ; snakes crawl on the earth without feet ; fishes swim in water, by means of fins ; beasts have feet, with hoofs or claws, to walk or run on land.

All animals are fitted for certain modes of living. The birds which feed on flesh, have strong claws, to catch and hold small animals, and a hooked bill to tear the flesh in pieces ; such is the vulture and the hawk. Fowls which feed on insects and grain, have mostly a short strait bill, like the robin. Those which live on fish, have long legs for wading, or long bills for seizing and holding their prey, like the heron and fish hawk. Fowls which delight chiefly to fly in the air, and light and build nests on the trees, have their toes divided, by which they cling to the branches and twigs ; those which live in and about water have webbed feet, that is, their toes united by a film or skin, so that their feet serve as oars or paddles for swimming.

See the dog, the cat, the wolf, the lion, the panther and catamount ; what sharp claws and pointed teeth they have, to seize little animals, and tear them in pieces ! But see the gentle cow and ox, and timid sheep—these useful animals are made for man,—they have no claws, nor sharp teeth,—they have only blunt teeth in the under jaw, fitted to crop the grass of the field :—they feed in quiet, and come at the call of man. Oxen submit to the yoke, and plow the field, or draw the cart ;—the cow returns home at evening, to fill the farmer's pails with

milk, the wholesome food of men;—and the sheep yields her yearly fleece, to furnish us with warm garments.

Henry, tell me the number of days in a year. Three hundred and sixty five.—How many weeks in a year? Fifty two.—How many days in a week? Seven.—What are they called? Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday: Sunday is the Sabbath, or day of rest, and called the Lord's day, being devoted to religious duties.—How many hours are there in a day? Twenty four.—How many minutes in an hour? Sixty, and sixty seconds in a minute. Time is measured by clocks and watches, dials and glasses. The light of the sun makes the day, and the shade of the earth makes the night. The earth is round, and rolls round from west to east once in twenty four hours. The day time is for labor, and the night for sleep and repose. Children should go to bed early.

Charles, how is the year divided? Into months and seasons.—How many are the months? Twelve calendar months, and nearly thirteen lunar months. What are the names of the calendar months? January, February, March, April, May, June, July, August, September, October, November, December. January begins the year, and the first day of that month is called New Year's day. Then people express to each other their good wishes, and little boys and girls expect gifts of little books, toys and plums.—What is the lunar month? It is the time from one change of the moon to

another, which is about twenty nine-days, and a half.

John, what are the seasons? Spring, summer, autumn or fall, and winter. The spring is so called from the springing or first shooting of the plants: when they put forth leaves and blossoms, all nature is decked with bloom, and perfumed with fragrant odors. The spring months are March, April and May. The summer months are June, July and August, when the sun pours his heating rays on the earth, the trees are clothed with leaves and fruit, and the ground is covered with herbage. The autumnal months are September, October and November; which are also called *fall*, from the *fall* of the leaves. Now the fruits are gathered, the verdure of the plants decays; the leaves of the forest turn red or yellow, and fall from the trees, and nature is stripped of her verdant robes. Then comes dreary winter. In December, January and February, frost binds the earth in chains, and spreads an icy bridge over rivers and lakes: the snow, with her white mantle, enwraps the earth; no birds fill the air with the music of their notes; the beasts stand shivering in the stall: and men croud around the fire-side, or wrapped in wool and fur, prepare to meet the chilling blast.

ADVICE.

Prefer solid sense to vain wit; study to be useful rather than diverting; commend and respect nothing so much as true piety and virtue—Let no jest intrude to violate good manners; never utter what may offend the chastest ear.

TABLE XIX.

Words of three syllables, the full accent on the first, and the half accent on the third.

Note. In half accented terminations, *ate, ude, ure, ize, ute, ise, ule, uge, ide*, the vowel has its first sound generally, though not dwelt upon so long, or pronounced with so much force as in the full accented syllables. But in the terminations *ice, ive, ile*, the vowel has generally its second sound, and the final *e* is superfluous, or only softens *c*; as notice, relative, juvenile,—pronounced *notis, relativ, juvenil*. In the former case, the final *e* is in Roman; and in the latter case, in Italic.

TABLE XX.

LESSON I.

MY son, hear the counsel of thy father, and forsake not the law of thy mother.

If sinners entice thee to sin, consent thou not.

Walk not in the way with them; refrain thy feet from their path, for their feet run to evil, and make haste to shed blood.

II.

Be not wise in thine own eyes; but be humble.

Let truth only proceed from thy mouth.—Despise not the poor, because he is poor; but honor him who is honest and just. Envy not the rich, but be content with thy fortune. Follow peace with all men, and let wisdom direct thy steps.

III.

Happy is the man that findeth wisdom. She is of more value than rubies. Length of days is in her right hand, and in her left hand, riches and honor. Her ways are pleasant, and all her paths are peace. Exalt her and she shall promote thee: She shall bring thee to honor, when thou dost embrace her.

IV.

The ways of virtue are pleasant, and lead to life; but they who hate wisdom, love death. Therefore pursue the paths of virtue and peace, their safety and glory will be thy reward. All my delight is upon the saints that are in the earth, and upon such as excel in virtue.

TABLE XXII.

Words not exceeding three syllables, divided.

LESSON I.

THE wick-ed flee when no man pur-su-eth; but the right-e-ous are as bold as a li-on.

Vir-tue ex-alt-eth a na-tion; but sin is a reproach to a-ny peo-ple.

The law of the wise is a foun-tain of life to de-part from the snares of death.

Wealth got-ten by de-ceit, is soon wast-ed; but he that gath-er-eth by la-bor, shall in-crease in rich-es.

II.

I-dle-ness will bring thee to pov-er-ty; but by in-dus-try and pru-dence thou shalt be fill-ed with bread.

Wealth mak-eth ma-ny friends; but the poor are for-got-ten by their neigh-bors.

A pru-dent man fore-seeth the e-vil, and hid-eth him-self; but the thought-less pass on and are punished.

III.

Train up a child in the way he should go, and when he is old he will not de-part from it.

Where there is no wood the fire go-eth out, and where there is no tat-ler the strife ceas-eth.

A word fit-ly spok-en is like ap-ples of gold in pic-tures of sil-ver.

He that cover-eth his sins shall not prosper, but he that confess-eth and forsak-eth them shall find mercy.

IV.

The rod and re-proof give wisdom ; but a child left to him-self bring-eth his parents to shame.

Correct thy son, and he will give thee rest ; yea he will give thee delight to thy soul.

A man's pride shall bring him low ; but honor shall uphold the humble in spirit.

The eye that mock-eth at his father, and scorn-eth to obey his mother, the ravens of the valley shall pick it out, and the young eagles shall eat it.

V.

By the blessing of the upright, the city is exalted, but it is over-thrown by the mouth of the wicked.

Where no counsel is, the people fall ; but in the midst of counsellors there is safety.

The wisdom of the prudent is to understand his way, but the folly of fools is deceit.

A wise man fear-eth and depart-eth from evil ; but the fool rag-eth and is confident.

Be not hasty in thy spirit to be angry ; for anger rest-eth in the bosom of fools.

TABLE XXV.

THERE are five states of human life, infancy, childhood, youth, manhood, and old age. The infant is helpless; he is nourished with milk—when he has teeth, he begins to eat bread, meat, and fruit, and is very fond of cakes and plums. The little boy chuses some plaything that will make a noise, a hammer, a stick, or a whip. The little girl

loves her doll and learns to dress it. She chuses a closet for her baby-house, where she sets her doll in a little chair, by the side of a table, furnished with tea-cups as big as a thimble.

As soon as boys are large enough, they run away from home, grow fond of play, climb trees to rob birds' nests, tear their clothes, and when they come home, their parents often chastise them.—O how the rod makes their legs smart. —These are naughty boys, who love play better than their books—cruel boys, who rob the birds of their eggs,—poor little birds which do no harm, which fill the air with the sweet melody of their notes, and do much good by devouring the worms, and other insects, which destroy the fruits and herbage.

Charles, how many barley corns make an inch? Three.—How many inches are in a foot? Twelve.—How many feet in a yard? Three.—How many yards in a rod, perch, or pole? Five and a half.—How many rods in a mile? Three hundred and twenty.—How many rods in a furlong? Forty.—How many furlongs in a mile? Eight.—How many miles in a league? Three.—How many lines in an inch? Twelve.—What is a cubit? The length of the arm from the elbow to the end of the longest finger, which is about eighteen inches. A fathom is the distance of the ends of a man's fingers, when the arms are extended, which is about six feet.

Henry, tell me the gills in a pint. Four. Two pints make a quart, four quarts make a gallon. Barrels are of various sizes; some contain no more than twenty seven gallons, some thirty, or thirty two, others thirty six. A hogshead contains sixty three gallons; but we usually call punchons by the name of hogsheads, and these hold about one hundred and ten gallons. A pipe contains two hogsheads, or four barrels, or about one hundred and twenty gallons.

TABLE XXVII.

WILLIAM, tell me how many mills make a cent? Ten.—How many cents a dime? Ten.—Tell me the other coins of the United States. Ten dimes make a dollar, ten dollars an eagle, which is a gold coin, and the largest which is coined in the United States. Dimes and dollars are silver coins. Cents are copper coins. These are new species of

coin—What is the ancient manner of reckoning money? By pounds, shillings, pence and farthings. Four farthings make a penny, twelve pence a shilling, and twenty shillings a pound.

William loves fruit. See him picking strawberries—bring him a basket—let him put the berries in a basket—and carry them to his mamma and sisters. Little boys should be kind and generous—they should always carry some fruit home for their friends. Observe the cherry trees—see, how they begin to redden—in a few days, the cherries will be ripe, the honey-hearts, the black-hearts, and ox-hearts, how sweet they are. You must not eat too many, and make yourself sick. Fill your basket with cherries and give them to your little friends.

Now see the pears. The harvest-pear, how yellow. It is ripe, let me pick and eat it. The sugar pear, how plump and soft it is; and what a beautiful red covers one side of it. See the catherine pear, and the vergaloo, how rich, juicy, and delicious. But the peach—how it exceeds all fruit in its delicious flavor; what can equal its fragrance, and how it melts upon the tongue. The nutmeg, the rare-ripe with its blushing cheek, the white cling-stone with its crimson tints—and the lemon cling-stone with its golden hue, and all the varieties of the free stones. Such are the rich bounties of nature, bestowed on man to please his taste, preserve his health, and draw his grateful heart towards the Author of his happiness.

REMARKS.

A wise man will consider, not so much the present pleasure and advantage of a measure, as its future consequences.

Sudden and violent passions are seldom durable.

TABLE XXIX.

LESSON I.

BE not anxious for your life, what ye shall eat, or what ye shall drink ; nor for your body, what ye shall put on; for your heavenly Father knoweth that ye have need of these things.

Behold the fowls of the air : For they sow not, neither do they reap, nor gather into barns ; yet your heavenly Father feedeth them.

Consider the lilies of the field, how they grow ; they toil not, neither do they spin ; and yet Solomon in all his glory, was not arrayed like one of these.

II.

Therefore be not anxious for the good things of this life, but seek first the kingdom of heaven and its righteousness, and all these things shall be added to you.

Ask and it shall be given unto you : Seek and ye shall find : Knock, and it shall be opened.

Love your enemies ; bless them that curse you ; do good unto them that hate you ; and pray for them that scornfully use you and persecute you.

III.

When thou prayest, be not as the hypocrites, who love to pray standing in the synagogues, and in the streets, that they may be seen of men: But when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father who is in secret, and thy Father who seeth in secret shall reward thee openly.

IV.

Lay not up for yourselves treasures on earth, where moth and rust doth corrupt, and where thieves break through and steal; but lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through and steal: For where your treasure is, there will your heart be also.

Our Savior's Golden Rule.

ALL things which you would have men do to you, do ye the same to them; for this is the law and the prophets.

TABLE XXXI.

Familiar Lessons.

HENRY is a good boy. Come here, Henry, let me hear you read. Can you spell easy words? Hold up your head ; speak loud and plain. Keep your book clean ; do not tear it.

John, keep your seat, and sit still. You must not say a word, nor laugh nor play. Look on your book, learn your letters, study your lesson.

Charles, can you count? Try. One, two, three, four, five, six, seven, eight, nine, ten.—Well said; now spell bird. B-i-r-d. How the birds sing and hop from branch to branch among the trees. They make nests too, and lay eggs ; then sit on their eggs, and hatch young birds. Dear little birds, how they sing and play. You must not rob their nests, nor kill their young : it is cruel.

Moses, see the cat, how quiet she lies by the fire. Puss catches mice. Did you ever see puss watching for mice? How still and sly ! She creeps along, fixing her eyes steady on the place where the mouse lies. As soon as she gets near enough, she darts forward, and seizes the little victim by the neck. Now the little mouse will do no more mischief.

See the little helpless kittens. How warm and quiet they lie in their bed, while puss is gone. Take them in your hands, don't hurt them ; they are harmless, and do no hurt. They will not bite nor scratch. Lay them down softly, and let them go to sleep.

George, the sun has risen, and it is time for you to rise. See the sun, how it shines : it dispels the darkness of night, and makes all nature gay and cheerful. Get up, Charles ; wash your hands, comb your hair, and get ready for breakfast. What are we to have for breakfast? Bread and milk.

This is the best food for little boys. Sometimes we have coffee or tea, and toast. Sometimes we have cakes.

James, hold your spoon in your right hand; and if you use a knife and fork, hold the knife in your right hand. Do not eat fast: hungry boys are apt to eat fast, like the pigs. Never waste your bread; bread is gained by the sweat of the brow. Your father plants or sows corn; corn grows in the field; when it is ripe, it is cut, and put in the barn; then it is thrashed out of the ears, and sent to a mill: the mill grinds it, and the bolter separates the bran from the flour. Flour is wet with water or milk; and with a little yeast or leaven, it is raised, and made light; this is called dough: dough is baked in an oven, or pan, and makes bread.

THE SISTERS.

Emily, look at the flowers in the garden. What a charming sight. How the tulips adorn the borders of the alleys, dressing them with gayety. Soon the sweet pinks will deck the beds; and the fragrant roses perfume the air. Take care of the sweet-williams, the jonquils, and the artemisia. See the honey-suckle, how it winds about the column, and limbs along the margin of the windows. Now it is in bloom, how fragrant the air around it; how sweet the perfume, after a gentle shower, or amidst the soft dews of the evening. Such are the charms of youth, when robed in innocence; such is the bloom of life, when decked with modesty, and a sweet temper.—Come, my child, let me hear your song.

The Rose.

The rose had been wash'd, lately wash'd in a show'r,
That Julia to Emma convey'd;
A plentiful moisture encumber'd the flow'r,
And weigh'd down its beautiful head.

The cup was all filled, and the leaves were all wet,
 And seem'd, at a fanciful view,
 To weep with regret, for the buds it had left,
 On the flourishing bush where it grew.

I hastily seiz'd it, unfit as it was
 For a nosegay, so dripping and drown'd;
 And shaking it rudely,—too rudely, alas,
 I snapt it—it fell to the ground.

“ And such,” I exclaimed, “ is the pitiless part
 “ Some act by the delicate mind;
 “ Regardless of wringing and breaking a heart
 “ Already to sorrow resign'd.

“ This beautiful rose, had I shaken it less,
 “ Might have bloom'd with the owner a while;
 “ And the tear that is wip'd, with a little address,
 “ May be follow'd perhaps with a smile.”

Julia, rise in the morning betimes, dress the borders of the flower beds, pull up the noxious weeds, water the thirsty roots. See how the plants wither for want of rain. The flowers fade, the leaves shrivel and droop. Bring a little water to refresh them. Now the plants look green and fresh; the weeds which shaded or robbed their roots of moisture, are removed, and the plants will thrive. Does the heart want culture? Weed out the noxious passions from the heart, as you would hurtful plants from among the flowers. Cherish the virtues—love, kindness, meekness, modesty, goodness. Let them thrive, and produce their natural fruit, pure happiness, and joys serene through life.

Look to the gentle lambs, how innocent and playful; how agreeable to the sight; how pleasant the task to feed them; how grateful they are for your care. Julia, let me hear your song.

The Lamb.

A young feeble Lamb, as Emily pass'd,
 In pity she turn'd to behold;
 How it shiver'd and shrunk from the merciless blast,
 Then fell all benumb'd with the cold.

She rais'd it, and touch'd with the innocent's fate,
Its soft form to her bosom she prest;
But the tender relief was afforded too late,
It bleated, and died on her breast.

The moralist then, as the corse she resign'd
And weeping, spring flow'rs o'er it laid,
Thus mus'd, " So it fares with the delicate mind,
" To the tempest of fortune betray'd;
" Too tender, like thee, the rude shock to sustain,
" And deni'd the relief which would save,
" She's lost, and when pity and kindness are vain,
" Thus we dress the poor sufferer's grave."

Harriet, bring your book, let me hear you read.
What book have you? Let me see: a little volume
of poems. How many can you repeat? Let me
hear my dear Harriet speak one.

The Bird's Nest.

Yes, little nest, I'll hold you fast,
And little birds, one, two, three, four;
I've watch'd you long, you're mine at last;
Poor little things, you'll 'scape no more.

Chirp, cry, and flutter, as you will,
Ah! simple rebels, 'tis in vain;
Your little wings are unfledg'd still,
How can you freedom then obtain!

What note of sorrow strikes my ear?
Is it their mother thus distress?
Ah yes, and see, their father dear
Flies round and round, to seek their nest.

And is it I who cause their moan?
I, who so oft in summer's heat,
Beneath yon oak have laid me down
To listen to their songs so sweet!

If from my tender mother's side,
Some wicked wretch should make me fly,
Full well I know, 'twould her betide,
To break her heart, to sink, to die.

And shall I then so cruel prove;
Your little ones to force away!
No, no; together live and ove;
See here they are,—take them, I pray

Teach them in yonder wood to fly,
 And let them your sweet warbling hear,
 Till their own wings can soar as high,
 And their own notes may sound as clear.

Go, gentle birds; go free as air;
 While oft again in summer's heat,
 To yonder oak I will repair,
 And listen to your songs so sweet.

Mary, what a charming little sonnet your sister Harriet has repeated. Come, my sweet girl, you must let me hear what you can say. But stop, let me see your work. Your little fingers are very handy with a needle. Very pretty indeed; very pretty work. What small stitches. You shall hem and mark all your papa's handkerchiefs, and very soon you shall work a muslin frock for yourself. Now, my girl, let me hear you repeat some verses.

On a Goldfinch starved in his Cage.

Time was when I was free as air,
 The thistle's downy seed my fare,
 My drink the morning dew;
 I perch'd at will on every spray,
 My form genteel, my plumage gay,
 My strains for ever new.

But gaudy plumage, sprightly strain,
 And form genteel, were all in vain,
 And of a transient date;
 For caught and cag'd, and starv'd to death,
 In dyingsighs, my little breath
 Soon pass'd he wiry grate.

Thanks, little Miss, for all my woes,
 And thanks for this effectual close,
 And cure of ev'ry ill;
 More cruelty could none express,
 And I, if you had shown me less,
 Had been your pris'ner still.

Precepts concerning the social relations.

ART thou a young man, seeking for a partner for life? Obey the ordinance of God, and become a useful member of society. But be not in haste to marry, and let thy choice be directed by wisdom.

Is a woman devoted to dress and amusement? Is she delighted with her own praise, or an admirer of her own beauty? Is she given to much talking and loud laughter? If her feet abide not at home, and her eyes rove with boldness on the faces of men—turn thy feet from her, and suffer not thy heart to be ensnared by thy fancy.

But when thou findest sensibility of heart joined with softness of manners; an accomplished mind and religion, united with sweetness of temper, modest deportment, and a love of domestic life—Such is the woman who will divide the sorrows, and double the joys of thy life. Take her to thyself; she is worthy to be thy nearest friend, thy companion, the wife of thy bosom:

Art thou a young woman, wishing to know thy future destiny? Be cautious in listening to the addresses of men. Art thou pleased with smiles and flattering words? Remember that man often smiles and flatters most, when he would betray thee.

Listen to no soft persuasion, till a long acquaintance and a steady, respectful conduct have given thee proof of the pure attachment and honorable views of thy lover. Is thy suitor addicted to low vices? is he profane? is he a gambler? a tipler? a spendthrift? a haunter of taverns? has he lived in idleness and pleasure? has he acquired a contempt for thy sex in vile company? and above all, is he a scoffer at religion?—Banish such a man from thy presence; his heart is false, and his hand would lead thee to wretchedness and ruin.

Art thou a husband? Treat thy wife with tenderness and respect; reprove her faults with gentleness; be faithful to her in love; give up thy heart to her in confidence, and alleviate her cares.

Art thou a wife? Respect thy husband; oppose him not unreasonably, but yield thy will to his, and thou shalt be blest with peace and concord; study to make him respectable, as well for thine own sake, as for his; hide his faults; be constant in thy love; and devote thy time to the care and education of the dear pledges of thy love.

Art thou a parent? Teach thy children obedience; teach them temperance, justice, diligence in useful occupations; teach them science; teach them the social virtues, and fortify thy precepts by thine own example; above all teach them religion. Science and virtue will make them respectable in this life—religion and piety alone can secure to them happiness in the life to come.

Art thou a brother or a sister? Honor thy character by living in the bonds of affection with thy brethren. Be kind; be condescending. Is thy brother in adversity, assist him; if thy sister is in distress, administer to her necessities and alleviate her cares.

Art thou a son or a daughter? Be grateful to thy father, for he gave thee life: and to thy mother, for she sustained thee. Piety in a child is sweeter than the incense of Persia, yea more delicious than odors, wafted, by western gales, from a field of Arabian spices. Hear the words of thy father for they are spoken for thy good: give ear to the admonitions of thy mother, for they proceed from her tenderest love. Honor their gray hairs, and support them in the evening of life: and thine own children, in reverence of thy example, shall repay thy piety with filial love and duty.

FABLE I.

Of the Boy that stole Apples.

AN old man found a rude boy upon one of his trees stealing Apples, and desired him to come down; but the young Sauce-box told him plainly he would not. Won't you? said the old Man, then I will fetch you down; so he pulled up some tufts of Grass, and threw at him; but this only made the Youngster laugh, to think the old Man should pretend to beat him down from the tree with grass only.

Well, well, said the old Man, if neither words nor grass, will do, I must try what virtue there is in Stones; so the old man pelted him heartily with stones; which soon made the young Chap hasten down from the tree and beg the old Man's pardon.

MORAL.

If good words and gentle means will not reclaim the wicked, they must be dealt with in a more severe manner.

TABLE XXXII.

In all words ending in *ow* unaccented, *w* is silent, and *o* has its first sound. Many of these words are corrupted in vulgar pronunciation; *follow* is called *foller*, &c. for which reason the words of this class are collected in the following table.

Bår row	gal lows	nar row	win dow
bel low	bel lows	hol low	win now
bil low	har row	shad ow	yel low

TABLE XXXIII.

In the following words, *si* sound like *zb*. Thus, *confusion* is pronounced *confu-zhun*; *tra-sier*, *bra-zbur*; *o-zier*, *o-zbur*; *vi-sion*, *vizb-un*; *pleas-ure*, *pleazb-ur*.

Note. In this and the following table, the figures show the accented syllables, without any other direction.

FABLE II.

The country Maid and her Milk pail.

WHEN men suffer their imagination to amuse them, with the prospect of distant and uncertain improvements of their condition, they frequently sustain real losses, by their inattention to those affairs in which they are immediately concerned.

A country Maid was walking very deliberately with a pail of milk upon her head, when she fell into the following train of reflections: The money for which I shall sell this milk, will enable me to encrease my stock of eggs to three hundred. These eggs, allowing for what may prove addle, and what may be destroyed by vermin, will produce at least two hundred and fifty chickens. The chickens will

be fit to carry to market about Christmas, when poultry always bears a good price; so that by May day I cannot fail of having money enough to purchase a new gown. Green—let me consider—yes, green becomes my complexion best, and green it shall be. In this dress I will go to the fair, where all the young fellows will strive to have me for a partner; but I shall perhaps refuse every one of them, and with an air of disdain toss from them. Transported with this triumphant thought, she could not forbear acting with her head what thus passed in her imagination, when down came the pail of milk, and with it all her imaginary happiness.

TABLE XXXIV.

Words in which *cie*, *sic*, and *tie* are pronounced *she*; *tia* and *cia*, *ska*; *cious* and *tious*, *sbus*. Thus, *ancient*, *partial*, *captious*, are pronounced, *anshent*, *parsbal*, *capshus*. This rule will be sufficient to direct the learner to a right pronounciation, without distinguishing the silent letters.

FABLE III.

The Fox and the Swallow.

ARISTOTLE informs us, that the following fable was spoken by Esop to the Samians, on a debate upon changing their ministers, who were accused of plundering the commonwealth.

A Fox swimming across a river, happened to be entangled in some weeds that grew near the bank,

from which he was unable to extricate himself. As he lay thus exposed to whole swarms of flies, which were galling him and sucking his blood, a swallow, observing his distress, kindly offered to drive them away. By no means, said the Fox; for if these should be chased away, which are already sufficiently gorged, another more hungry swarm would succeed, and I should be robbed of every remaining drop of blood in my veins.

TABLE XXXV.

In the following words the vowels are short, and the accented syllable must be pronounced as though it ended with the consonant *sb.* Thus, *pre-cious, spe-cial, effi-cient, logi-cian, militia, addi-tion*, are pronounced, *presb-us, spesb-ul, effisb-ent, logish-an, milish-a, addish-on.* These words will serve as examples for the following table.

The compounds and derivatives follow the same rule

In the following words, the consonant *q* terminates a syllable: but perhaps the ease of the learner may render a different division more eligible.

SELECT SENTENCES.

Never speak of a man's virtues to his face, nor of his faults behind his back; thus you will equally avoid flattery which is disgusting, and slander which is criminal.

If you are poor, labor will procure you food and clothing—if you are rich, it will strengthen the body, invigorate the mind, and keep you from vice.—Every man therefore should be busy in some employment.

FABLE IV.

The Cat and the Rat.

A CERTAIN Cat had made such unmerciful havoc among the vermin of her neighborhood, that not a single Rat or Mouse dared venture to appear abroad. Puss was soon convinced, that if affairs remained in their present situation, she must be totally unsupplied with provision. After mature deliberation therefore, she resolved to have recourse to stratagem. For this purpose, she suspended herself from a hook with her head downwards, pretending to be dead. The Rats and Mice as they peeped from their holes observing her, in this dangling attitude, concluded she was hanging for some misdemeanor; and with great joy immediately sallied forth in quest of their prey. Puss, as soon as a sufficient number were collected together, quitting her hold, dropped into the midst of them; and very few had the fortune to make good their retreat. This artifice having succeeded so well, she was encouraged to try the event of a second. Accordingly she whitened her coat all over, by rolling herself in a heap of flour, and in this disguise lay

concealed in the bottom of a meal tub. This stratagem was executed in general with the same effect as the former. But an old experienced Rat, altogether as cunning as his adversary, was not so easily ensnared. I don't much like, said he, that white heap yonder: Something whispers me there is mischief concealed under it. 'Tis true it may be meal; but it may likewise be something that I should not relish quite so well. There can be no harm at least in keeping at a proper distance; for caution, I am sure, is the parent of safety.

FABLE V.

The Fox and the Bramble.

A FOX, closely pursued by a pack of Dogs, took shelter under the covert of a Bramble. He rejoiced in this asylum; and for a while, was very happy; but soon found that if he attempted to stir, he was wounded by thorns and prickles on every side. However, making a virtue of necessity, he forbore to complain; and comforted himself with reflecting that no bliss is perfect; that good and evil are mixed, and flow from the same fountain. These Briars, indeed, said he, will tear my skin a little, yet they keep off the dogs. For the sake of the good then let me bear the evil with patience; each bitter has its sweet; and these Brambles, though they wound my flesh, preserve my life from danger.

FABLE VI.

The Bear and the Two Friends.

TWO Friends, setting out together upon a journey, which led through a dangerous forest, mutually promised to assist each other, if they should happen to be assailed. They had not proceeded far, before they perceived a Bear making towards them with great rage.

There were no hopes in flight; but one of them, being very active, sprung up into a tree; upon which the other, throwing himself flat on the ground, held his breath and pretended to be dead; remembering to have heard it asserted, that this creature will not prey upon a dead carcase. The bear came

up, and after smelling to him some time, left him, and went on.—When he was fairly out of sight and hearing, the hero from the tree called out—Well, my friend, what said the bear? he seemed to whisper you very closely. He did so, replied the other, and gave me this good piece of advice, never to associate with a wretch, who in the hour of danger, will desert his friend.

FABLE VII.

The Two Dogs.

HASTY and inconsiderate connections are generally attended with great disadvantages; and much of every man's good or ill fortune, depends upon the choice he makes of his friends.

A good-natured Spaniel overtook a surly Mastiff, as he was travelling upon the high road. Tray, although an entire stranger to Tiger, very civilly accosted him; and if it would be no interruption, he said, he should be glad to bear him company on his way. Tiger, who happened not to be altogether in so growling a mood as usual, accepted the proposal; and they very amicably pursued their journey together. In the midst of their conversation, they arrived at the next village, where Tiger began to display his malignant disposition, by an unprovoked attack upon every dog he met. The villagers immediately sallied forth with great indignation, to rescue their respective favorites; and falling upon our two friends, without distinction or mercy, poor Tray was most cruelly treated, for no other reason, but his being found in bad company.

TABLE XXXIX.

Words of French original, in which *ch* sound like *sh*, and *i* accented, like *e* long.

SELECT SENTENCES.

We may as well expect that God will make us rich without industry, as that he will make us good and happy, without our own endeavors.

Zeno, hearing a young man very loquacious, told him, that men have two ears and but one tongue; therefore they should hear much and speak little.

A man who, in company, engrosses the whole conversation, always gives offense; for the company consider him as assuming a degree of superiority, and treating them all as his pupils.

The basis of all excellence in writing and conversation, is truth—truth is intellectual gold, which is as durable as it is splendid and valuable.

Faction seldom leaves a man honest, however it may find him.

FABLE VIII.

The Partial Judge.

A FARMER came to a neighboring Lawyer, expressing great concern for an accident which he said had just happened. One of your Oxen, continued he, has been gored by an unlucky Bull of mine, and I should be glad to know how I am to make you reparation. Thou art a very honest fellow, replied the Lawyer, and wilt not think it unreasonable that I expect one of thy Oxen in return. It is no more than justice, quoth the Farmer, to be sure; but what did I say?—I mistake—It is *your* Bull that has killed one of *my* Oxen. Indeed! says the Lawyer, that alters the case; I must inquire into the affair; and if—And *if!* said the Farmer—the business I find would have been concluded without an *if*, had you been as ready to do justice to others, as to exact it from them.

TABLE XL.

Words in which *g* is hard before *e*, *i*, and *y*.

big gin	jag ged	twig gy	to geth er
brag ger	knag gy	wag gish	pet ti fog ger

The following are pronounced as though they were written with double *g*. Thus, finger is pronounced *fingger*

Finger	linger	young er	long est
anger	lingo	young est	strong er
hunger	linguist	long er	mong er

These with their compounds and derivatives, are most of the words in the language, in which *g* has its hard sound before *e*, *i*, and *y*. But to these must be added the derivatives of verbs ending in *g*. Thus from *dig* come *diggeth*, *diggest*, *digged*, *digging*, &c. in which *g* is hard before *e* and *i*.

TABLE XLI.

The Boy that went to the Wood to look for Birds' Nests, when he should have gone to School.

WHEN Jack got up, and put on his clothes, he thought if he could get to the wood he should be quite well; for he thought more of a bird's nest, than his book, that would make him wise and great. When he came there, he could find no nest, but one that was on the top of a tree, and with much ado he got up to it, and robbed it of the eggs.—Then he tried to get down; but a branch of the tree found a hole in the skirt of his coat, and held him fast. At this time he would have been glad to be at school; for the bird in a rage at the loss of her eggs, flew at him, and was like to pick out his eyes. Now it was that the sight of a man at the foot of the tree, gave him more joy than all the nests in the world. This man was so kind as to chase away the bird, and help him down from the tree; and from that time forth he would not loiter from school; but grew a good boy and a wise young man; and had the praise and good will of all that knew him.

OBSERVATIONS.

The cheerful man hears the lark in the morning; the pensive man hears the nightingale in the evening.

He who desires no virtue in a companion, has no virtue himself; and that state is hastening to ruin, in which no difference is made between good and bad men.

Some men read for the purpose of learning to write; others, for the purpose of learning to talk—the former study for the sake of science; the latter, for the sake of amusement.

TABLE XLII.

It is a rule in the language, that *c* and *g* are hard at the end of words, and they commonly are so at the end of syllables; but in the following table they are soft, like *s* and *j* at the end of the accented syllable. Thus, *magic*, *acid*, are pronounced *majic*, *asid*, and ought to be divided mag-ic, ac-id. It is a matter disputed by teachers which is the most eligible division—*mag-ic*, *ac-id*, or *ma-gic*, *a-cid*. However, as children acquire a habit of pronouncing *c* and *g* hard at the end of syllables, I choose not to break the practice, but have joined these consonants to the last syllable. The figures show that the vowels of the accented syllables are all short.

TABLE XLV.

The history of the Creation of the World.

IN six days God made the world, and all things that are in it. He made the Sun to shine by day, and the Moon to give light by night.—He made all the beasts that walk on the earth, all the birds that fly in the air, and all the fish that swim in the sea. Each herb, and plant, and tree, is the work of his hands. All things, both great and small that live and move, and breathe in this wide world, to him do owe their birth, to him their life. And God saw that all the things he had made were good. But as yet there was not a man to till the ground: so God made man of the dust of the earth, and breathed into him the breath of life, and gave him rule over all that he had made. And the man gave names to all the beasts of the field, the fowls of the air, and the fish of the sea. But there was not found an help meet for man; so God brought on him a deep sleep, and then took from his side a rib, of which he made a wife,

and gave her to the man, and her name was Eve—
And from these two came all the sons of men.

All things are known to God; though his throne of state is far on high, yet doth his eye look down upon us in this lower world, and see all the ways of the sons of men.

If we go out, he marks our steps: and when we go in, no door can shut him from us. While we are by ourselves, he knows all our vain thoughts, and the ends we aim at: And when we talk to friend or foe, he hears our words, and views the good or harm we do to them, or to ourselves.

When we pray, he notes our zeal. All the day long he minds how we spend our time, and no dark night can hide our works from him. If we play the cheat, he marks the fraud, and hears the least word of a false tongue.

He sees if our hearts are hard to the poor, or if by alms we help their wants: If in our breast we pine at the rich, or if we are well pleased with our own state. He knows all that we do; and be we where we will, he is sure to be with us.

OBSERVATIONS.

He seldom lives frugally, who lives by chance.

Most men are more willing to indulge in easy vices, than to practice laborious virtues.

A man may mistake the love of virtue for the practice of it; and be less a good man, than the friend of goodness.

Without frugality, none can be rich; and with it, few would be poor.

Moderation and mildness, often effect what cannot be done by force. A Persian writer finely observes, that "a gentle hand leads the elephant himself by a hair."

The most necessary part of learning is, to unlearn our errors.

Small parties make up in diligence what they want in numbers.

Some talk of subjects which they do not understand; others praise virtue, who do not practice it.

No persons are more apt to ridicule or censure others, than those who are most apt to be guilty of follies and faults.

OBSERVATIONS.

Seek a virtuous man for your friend, for a vicious man can neither love long, nor be long beloved.—The friendships of the wicked are conspiracies against morality and social happiness.

More persons seek to live long, though long life is not in their power; than to live well, though a good life depends on their own will.

USEFUL LESSONS.

JOHN can tell how many square rods of ground make an acre. Let me hear him. Three feet make a yard; five yards and a half make a rod or perch; forty square rods make a rood or one quarter of an acre, and one hundred and sixty square rods make an acre. One team will plow an acre in a day—sometimes more.

In solids, forty feet of round timber, or fifty feet of hewn timber, make a ton. A cord of wood contains one hundred and twenty eight solid feet; that is, a pile four feet high, four feet wide, and eight feet long.

In cloth measure, two inches and a fifth make a nail, —four nails, one quarter of a yard—thirty six inches or three feet make a yard—three quarters of a yard make an ell Flemish—and five quarters, make an English ell.

Let us examin the weights used in our own country. How are heavy goods weighed? By avordupois weight—in which sixteen drams make an ounce—sixteen ounces, one pound—twenty eight pounds, one quarter of a hundred—four quarters, or one hundred and twelve pounds make a hundred—and twenty hundreds, one ton.

By this weight, are sold hay, sugar, coffee, and all heavy goods and metals, except gold and silver.

What is troy weight? It is that by which is estimated the quantity of gold and silver, jewelry, and the drugs sold by the druggist and apothecary. In troy weight, twenty four grains make a penny weight—twenty penny weights, one ounce—and twelve ounces, one pound. These are the divisions used by the silversmith and jeweller. But the apothecary uses a different division, and in his weight, twenty grains make a scruple—three scruples one dram—eight drams, one ounce—and, twelve ounces, one pound.

The dollar is one hundred cents; but the value of a pound, shilling and penny, is different, in different States, and in England. English money is called Sterling—One dollar is four shillings and six pence sterling—in New England and Virginia, it is six shillings—in New York and North Carolina, it is eight shillings—in New Jersey, Pennsylvania, Delaware and Maryland, it is seven shillings—

114 *An Easy Standard of Pronunciation.*

and six pence—in South Carolina and Georgia, it is four shillings and eight pence. But these differences give great trouble, and will soon be laid aside as useless,—all money will be reckoned in dollars and cents.

OBSERVATIONS AND MAXIMS.

THE path of duty, is always the path of safety.

Be very cautious in believing ill of your neighbor; but more cautious in reporting it.

It requires but little discernment to discover the imperfections of others; but much humility to acknowledge our own.

Many evils incident to human life are unavoidable; but no man is vicious, except by his own choice.

Avoid vicious company, where the good are often made bad, and the bad worse. If the good ever associate with evil men, it should be for the same reason as a physician visits the sick,—not to catch the disease, but to cure it.

Some people are lost for want of good advice but more for want of giving heed to it.

EXPLANATION

Of the PAUSES and other CHARACTERS used in WRITING.

A comma, (,) is a pause of one syllable—A semicolon (;) two—A colon (:), four—A period (.) six—An interrogation point (?) shows when a question is asked; as, *What do you see?* An exclamation point (!) is a mark of wonder or surprise; as, *O the folly of sinners!*—The pause of these two points is the same as a colon or a period, and the sentence should usually be closed with a raised tone of voice.

() A parenthesis includes a part of a sentence, which is not necessary to make sense, and should be read quicker, and in a weaker tone of voice.

[] Brackets or Hooks, include words that serve to explain a foregoing word or sentence.

- A Hyphen joins words or syllables; as, *sea-water.*

' An Apostrophe shows when a letter is omitted, as *we'd* for *used.*

A. A Caret shows when a word or number of words are omitted through mistake; as, *this is ^{my} book.*

A

“ A quotation or double comma, includes a passage that is taken from some other author in his own words.

¶ The index, points to some remarkable passage.

¶ The Paragraph begins a new subject.

|| The Section is used to divide chapters.

*†‡ An Asterisk, and other references, point to a note in the margin or bottom of a page.

OF CAPITAL LETTERS.

Sentences should begin with a capital letter—Also every line in poetry. Proper names, which are the names of persons, places, rivers, mountains, lakes, &c. should begin with a capital. Also the name of the Supreme Being.

ADDITIONAL LESSONS.

DOMESTIC ECONOMY

Or, The History of THRIFTY and UNTHRIFTY.

THERE is a great difference among men, in their ability to gain property; but a still greater difference in their power of using it to advantage. Two men may acquire the same amount of money, in a given time; yet one will prove to be a poor man, while the other becomes rich. A chief and essential difference in the management of property, is, that one man spends only the *interest* of his money, while another spends the *principal*.

I know a farmer by the name of THRIFTY, who manages his affairs in this manner: He rises early in the morning, looks to the condition of his house, barn, home-lot and stock—sees that his cattle, horses and hogs are fed; examines the tools to see whether they are all in good order for the workmen—takes care that breakfast is ready in due season, and begins work in the cool of the day—When in the field, he keeps steadily at work, though not so violently as to fatigue and exhaust the bo-

dy.—nor does he stop to tell or hear long stories—When the labor of the day is past, he takes refreshment, and goes to rest at an early hour—In this manner he earns and gains money.

When *Thrifty* has acquired a little property, he does not spend it or let it slip from him, without use or benefit. He pays his taxes and debts when due or called for, so that he has no officers fees to pay, nor expenses of courts. He does not frequent the tavern and drink up all his earnings in liquor that does him no good. He puts his money to use, that is, he buys more land, or stock, or lends his money at interest—in short, he makes his money produce some profit or income. These savings and profits, though small by themselves, amount in a year to a considerable sum, and in a few years, they swell to an estate—*Thrifty* becomes a wealthy farmer, with several hundred acres of land, and a hundred head of cattle.

Very different is the management of **UNTHRIFTY**: He lies in bed, till a late hour, in the morning—then rises, and goes to the bottle for a dram, or to the tavern for a glass of bitters—Thus he spends six cents before breakfast, for a dram that makes him dull and heavy all day. He gets his breakfast late, when he ought to be at work—When he supposes he is ready to begin the work of the day, he finds he has not the necessary tools, or some of them are out of order,—the plow-share is to be sent half a mile to a blacksmith to be mended; a tooth or two in a rake or the handle of a hoe, is broke; or a sythe or an ax is to be ground.—Now, he is in a great hurry, he bustles about to make preparation for work—and what is done in a hurry is ill done—he loses a part of the day in getting ready—and perhaps the time of his workmen. At ten or eleven o'clock, he is ready to go to work—then comes a boy and tells him, the sheep have escaped from the pasture—or the cows have got among his corn—or the hogs into the garden—He frets and storms, and runs to drive them out—a half hour or more time is lost in driving the cattle from mischief, and repairing a poor broken fence—a fence that answers no purpose but to lull him into security, and teach his horses and cattle to be unruly—After all this bustle, the fa-

tigue of which is worse than common labor, *Unthrifty* is ready to begin a day's work at twelve o'clock.—Thus half his time is lost in supplying defects, which proceed from want of foresight and good management. His small crops are damaged or destroyed by unruly cattle.—His barn is open and leaky, and what little he gathers, is injured by the rain and snow.—His house is in a like condition—the shingles and clapboards fall off and let in the water, which causes the timber, floors and furniture to decay—and exposed to inclemencies of weather, his wife and children fall sick—their time is lost, and the mischief closes with a ruinous train of expenses for medicines and physicians.—After dragging out some years of disappointment, misery and poverty, the lawyer and the sheriff sweep away the scanty remains of his estate. This is the history of *UNTHRIFTY*—his principal is spent—he has no interest.

Not unlike this, is the history of the *Grog-drinker*. This man wonders why he does not thrive in the world; he cannot see the reason why his neighbor *Temperance* should be more prosperous than himself—but in truth, he makes no calculations. Ten cents a day for grog, is a small sum, he thinks, which can hurt no man! But let us make an estimate—arithmetic is very useful for a man who ventures to spend small sums every day. Ten cents a day amount in a year to thirty-six dollars and a half—a sum sufficient to buy a good farm horse! This surely is no small sum for a farmer or mechanic—But in ten years, this sum amounts to three hundred and sixty five dollars, besides interest in the mean time! What an amount is this for drams and bitters in ten years! it is money enough to build a small house! But look at the amount in thirty years!—One thousand and ninety five dollars! What a vast sum to run down one man's throat in liquor—a sum that will buy a farm sufficient to maintain a small family. Suppose a family to consume a quart of spirits in a day, at twenty five cents a quart. The amount of this in a year, is ninety one dollars and a quarter—in ten years, nine hundred and twelve dollars and a half—and in thirty years, two thousand, seven hundred and thirty seven dollars and a half! A great estate, may thus

be consumed, in single quarts of rum ! What mischief is done by the love of spirituous liquors ! :

But, says the laboring man, " I cannot work without spirits—I must have something to give me strength." Then drink something that will give durable nourishment—Of all the substances taken into the stomach, spirituous liquors contain the least nutriment, and add the least to bodily vigor. Malt liquors, melasses and water, milk and water, contain nutriment, and even cyder is not wholly destitute of it—but distilled spirituous liquors contain little or none.

But says the laborer or the traveller, " spirituous liquors warm the stomach, and are very useful in cold weather"—No, this is not correct. Spirits enliven the feelings for half an hour—but leave the body more dull, languid and cold than it was before. A man will freeze the sooner for drinking spirits of any kind. If a man wishes to guard against cold, let him eat a biscuit, a bit of bread or a meal of victuals. Four ounces of bread will give a more durable warmth to the body, than a gallon of spirits—food is the natural stimulant or exciting power of the human body—it gives warmth and strength, and does not leave the body, as spirit does, more feeble and languid.—The practice of drinking spirits gives a man red eyes, a bloated face, and an empty purse—It injures the liver, produces dropsy, occasions a trembling of the joints and limbs, and closes life with a slow decay or palsy—This is a short history of the drinker of distilled spirits. If a few drinking men are found to be exceptions to this account, still the remarks are true, as they apply to most cases. Spirituous liquors shorten more lives than famine, pestilence and the sword !

LESSONS ON FAMILIAR SUBJECTS.

ALL mankind live on the fruits of the earth—the first and most necessary employment therefore is the tillage of the ground, called agriculture, husbandry, or farming. The farmer clears his land of trees, roots and stones—he surrounds it with a fence of poles, posts and rails, stone-wall, hedge or ditch. He plows and harrows, or drags the soil, to break the clods or turf, and make it mellow and pliable—he manures it also, if necessary, with

stable dung, ashes, marl, plaster, lime, sea-shells, or decayed vegetable substances. He plants maiz in rows, or sows wheat, barley, rye, oats, buckwheat, flax or hemp. He hoes the maiz two or three times, kills the weeds and draws the earth round the hills to support and nourish the plants—When the grain is ripe, he reaps or cradles his grain, and pulls the flax.—The ears of maiz are picked by hand, or the stalks cut with a sickle or knife and the husks are stripped off, in the evening. With what joy does the farmer gather his crops, of the former and latter harvest !—He toils indeed, but he reaps the fruit of his labor in peace—he fills his granary in summer, and in autumn presents a thank-offering to God for his bounty.

See the mower, how he swings his sythe !—The grass falls prostrate before him—the glory of the field is laid low—the land is stripped of its verdant covering. See the stripling follow his father or brother, and with a pitch fork, spread the thick swath, and shake the grass about the meadow ! How fragrant the smell of new made hay—how delightful the task to tend it !

Enter the forest of the wilderness—See here and there a rustic dwelling made of logs—a little spot cleared and cultivated—a thatched hovel to shelter a cow and her food—the forest resounding with the ax-man's blows, as he levels the sturdy beech, maple, or hemlock ; while the crackling fire aids his hands, by consuming the massy piles of wood which he cannot remove—Hear the howling wolf, or watch the nimble deer, as he bounds along among the trees—The faithful cow, in search of shrubs and twigs, strays from the cottage, and the owner seeks her at evening, in the gloomy forest ; led by the tinkling of the bell, he finds and drives her home. A bowl of bread and milk, furnishes him with his frugal repast ; he retires weary to rest—and the sleep of the laboring man is sweet.

See the dairy woman, while she fills her pails with new milk—the gentle cows quietly chewing their cuds by her side. Enter the milk-room, see the pans, pails and tubs, how clean and sweet, all in order, and fit for use ! The milk strained and put in a cool place—the cream skimmed off for butter, or the milk set for cheese

—Here is a churn as white as ivory—there a cheese-press forcing the whey from the curd!—See the shelves filled with cheeses—What a noble sight! and butter as yellow as the purest gold!

George, let us look into the work-shops among the mechanics. Here is a carpenter, he squares a post or a beam; he scores or notches it first, and then hews it with his broad-ax. He bores holes with an auger, and with the help of a chisel forms a mortise for a tenon. He measures with a square or rule, and marks his work with a compass. Each timber is fitted to its place. The sills support the posts, and these support the beams. Braces secure the frame of a building from swaying or leaning—Girders and joists support the floors; studs, with the posts, support the walls, and rafters uphold the roof.

Now comes the joiner with his chest of tools. He plains the boards, joints the shingles, and covers the building—With his saw he cuts boards, with his gimblet or whimble, he makes holes for nails, pins or spikes,—with his chisel and gouge, he makes mortises.

Then comes the mason with his trowel—the laths are nailed to the studs and joists to support the plaster, first a rough coat of coarse mortar of lime and sand is laid on, and this is covered with a beautiful white plaster. And last of all comes the painter with his brush and oil-pots—he mixes the oil and white lead, and gives to the apartments the color which the owner or his lady sees fit to direct.

A MORAL CATECHISM.

Question. WHAT is moral virtue?

Answer. It is an honest upright conduct in all our dealings with men.

Q. What rules have we to direct us in our moral conduct?

A. God's word, contained in the bible, has furnished all necessary rules to direct our conduct.

Q. In what part of the bible are these rules to be found?

A. In almost every part; but the most important duties between men are summed up in the beginning of Matthew, in CHRIST'S Sermon on the Mount.

OF HUMILITY.

Q. *What is humility ?*

A. A lowly temper of mind.

Q. *What are the advantages of humility ?*

A. The advantages of humility in this life are very numerous and great. The humble man has few or no enemies. Every one loves him and is ready to do him good. If he is rich and prosperous, people do not envy him ; if he is poor and unfortunate, every one pities him, and is disposed to alleviate his distresses.

Q. *What is pride ?*

A. A lofty high minded disposition.

Q. *Is pride commendable ?*

A. By no means. A modest, self approving opinion of our own good deeds is very right—it is natural—it is agreeable, and a spur to good actions. But we should not suffer our hearts to be blown up with pride; whatever great and good deeds we have done ; for pride brings upon us the ill-will of mankind, and displeasure of our Maker.

Q. *What effect has humility upon our own minds ?*

A. Humility is attended with peace of mind and self-satisfaction. The humble man is not disturbed with cross accidents, and is never fretful and uneasy ; nor does he repine when others grow rich. He is contented, because his mind is at ease.

Q. *What is the effect of pride on a man's happiness ?*

A. Pride exposes a man to numberless disappointments and mortifications. The proud man expects more attention and respect will be paid to him, than he deserves, or than others are willing to pay him. He is neglected, laughed at and despised, and this treatment frets him, so that his own mind becomes a seat of torment. A proud man cannot be a happy man.

Q. *What has Christ said, respecting the virtue of humility ?*

A. He has said, "Blessed are the poor in spirit for theirs is the kingdom of heaven." Poorness of spirit is humility ; and this humble temper prepares a man for heaven, where all is peace and love.

OF MERCY.

Q. What is mercy ?

A. It is tenderness of heart.

Q. What are the advantages of this virtue ?

A. The exercise of it tends to diffuse happiness and lessen the evils of life. Rulers of a merciful temper will make their *good* subjects happy; and will not torment the *bad*, with needless severity. Parents and masters will not abuse their children and servants with harsh treatment. More love, more confidence, more happiness, will subsist among men, and of course society will be happier.

Q. Should not beasts as well as men be treated with mercy ?

A. They ought indeed. It is wrong to give needless pain even to a beast. Cruelty to the brutes shows a man has a hard heart, and if a man is unfeeling to a beast, he will not have much feeling for men. If a man treats his beast with cruelty, beware of trusting yourself in his power. He will probably make a severe master and a cruel husband.

Q. How does cruelty show its effects ?

A. A cruel disposition is usually exercised upon those who are under its power. Cruel rulers make severe laws which injure the persons and properties of their subjects. Cruel officers execute laws in a severe manner, when it is not necessary for public good. A cruel husband abuses his wife and children. A cruel master acts the tyrant over his apprentices and servants. The effects of cruelty are, hatred, quarrels, tumults and wretchedness.

Q. What does Christ say of the merciful man ?

A. He says he is "blessed, for he shall obtain mercy." He who shows mercy and tenderness to others, will be treated with tenderness and compassion himself.

OF PEACE-MAKERS.

Q. Who are peace-makers ?

A. All who endeavor to prevent quarrels and disputes among men; or to reconcile those who are separated by strife.

Q. Is it unlawful to contend with others on any occasion ?

A. It is impossible to avoid some differences with

men; disputes should be always conducted with temper and moderation. The man who keeps his temper will not be rash, and do or say things which he will afterwards repent of. And though men should sometimes differ, still they should be friends. They should be ready to do kind offices to each other.

Q. What is the reward of the peace-maker?

A. He shall be "blessed, and called the child of God." The mild, peaceable, friendly man, resembles God. What an amiable character is this! To be like our heavenly Father, that lovely, perfect and glorious being, who is the source of all good, is to be the best and happiest of men.

OF PURITY OF HEART.

Q. What is a pure heart?

A. A heart free from all bad desires, and inclined to conform to the divine will in all things.

Q. Should a man's intentions as well as his actions be good?

A. Most certainly. Actions cannot be called good, unless they proceed from good motives. We should wish to see and to make all men better and happier—we should rejoice at their prosperity. This is benevolence.

Q. What reward is promised to the pure in heart?

A. Christ has declared "they shall see God." A pure heart is like God, and those who possess it shall dwell in his presence and enjoy his favor for ever.

OF ANGER.

Q. Is it right ever to be angry?

A. It is right in certain cases that we should be angry; as when gross affronts are offered to us, and injuries done us by design. A suitable spirit of resentment, in such cases, will obtain justice for us, and protect us from further insults.

Q. By what rule should anger be governed?

A. We should never be angry without cause; that is, we should be certain that a person means to affront, injure or insult us, before we suffer ourselves to be angry. It is wrong, it is mean, it is a mark of a little mind to take fire at every little trifling dispute. And when we have real cause to be angry, we should observe mode-

ration. We should never be in a passion. A passionate man is like a madman and is always inexcusable. We should be cool even in anger; and be angry no longer than to obtain justice. In short, we should "be angry and sin not."

OF REVENGE.

Q. What is revenge?

A. It is to injure a man because he has injured us.

Q. Is this justifiable?

A. Never, in any possible case. Revenge is perhaps the meanest, as well as wickedest vice in society.

Q. What shall a man do to obtain justice when he is injured?

A. In general, laws have made provision for doing justice to every man; and it is right and honorable, when a man is injured, that he should seek a recompence. But a recompence is all he can demand, and of that he should not be his own judge, but should submit the matter to judges appointed by authority.

Q. But suppose a man insults us in such a manner that the law cannot give us redress?

A. Then forgive him. "If a man strikes you on one cheek, turn the other to him," and let him repeat the abuse, rather than strike him.

Q. But if we are in danger from the blows of another, may we not defend ourselves?

A. Most certainly. We have always a right to defend our persons, property and families. But we have no right to fight and abuse people merely for revenge. It is nobler to forgive. "Love your enemies—bless them that curse you—do good to them that hate you—pray for them that use you ill,"—these are the commands of the blessed Savior of men. The man who does this is great and good; he is as much above the little, mean, revengeful man, as virtue is above vice, or as heaven is higher than hell.

OF JUSTICE.

Q. What is justice?

A. It is giving to every man his due.

Q. Is it always easy to know what is just?

A. It is generally easy; and where there is any diffi-

culty in determining, let a man consult the golden rule —“To do to others, what he could reasonably wish they should do to him, in the same circumstances.”

Q. What are the ill effects of injustice ?

A. If a man does injustice, or rather, if he refuses to do justice, he must be compelled. Then follows a law-suit, with a series of expenses, and what is worse, ill-blood and enmity between the parties. Somebody is always the worse for law-suits, and of course society is less happy.

OF GENEROSITY.

Q. What is generosity ?

A. It is some act of kindness performed for another which strict justice does not demand.

Q. Is this a virtue ?

A. It is indeed a noble virtue. To do justice, is well ; but to do more than justice, is still better, and may proceed from nobler motives.

Q. What has Christ said respecting generosity ?

A. He has commanded us to be generous in this passage, “Whosoever shall compel (or urge) you to go a mile, go with him *two*.”

Q. Are we to perform this literally ?

A. The meaning of this command will not always require this.—But in general we are to do more for others than they ask, provided we can do it, without essentially injuring ourselves. We ought cheerfully to suffer many inconveniences to oblige others, though we are not required to do ourselves any essential injury.

Q. Of what advantage is generosity to the man who exercises it ?

A. It lays others under obligations to the generous man ; and the probability is, that he will be repaid three fold. Every man on earth wants favors at some time or other in his life ; and if we will not help others, others will not help us. It is for a man's interest to be generous.

Q. Ought we to do kind actions because it is for our interest ?

A. This may be a motive at all times ; but if it is the principal motive, it is less honorable. We ought to do

good, as we have opportunity, at all times and to all men, whether we expect a reward or not; for if we do good, somebody is the happier for it. This alone is reason enough, why we should do all the good in our power.

OF GRATITUDE.

Q. What is gratitude?

A. A thankfulness of heart for favors received.

Q. Is it a duty to be thankful for favors?

A. It is a duty and a virtue. A man who does not feel grateful for kind acts done for him by others, does not deserve favors of any kind. He ought to be shut out from the society of the good. He is worse than a savage, for a savage never forgets an act of kindness.

Q. What is the effect of true kindness?

A. It softens the heart towards the generous man, and every thing which subdues the pride and other un-social passions of the heart, fits a man to be a better citizen, a better neighbor, a better husband and a better friend. A man who is sensible of favors and ready to acknowledge them, is more inclined to perform kind offices, not only towards his benefactor, but towards all others.

OF TRUTH.

Q. What is truth?

A. It is speaking and acting agreeable to fact.

Q. Is it a duty to speak truth at all times?

A. If we speak at all, we should tell the truth. It is not always necessary to tell what we know. There are many things which concern ourselves and others which we had better not publish to the world.

Q. What rules are there respecting the publishing of truth?

A. 1. When we are called upon to testify in courts, we should speak the whole truth and that without disguise. To leave out small circumstances, or to give a coloring to others, with a view to favor one side more than the other, is to the highest degree criminal.

2. When we know something of our neighbor which

is against his character, we may not publish it, unless to prevent his doing an injury to another person.

3. When we sell any thing to another, we ought not to represent the article to be better than it really is. If there are faults in it which may easily be seen, the law of man does not require us to inform the buyer of these faults, because he may see them himself. But it is not honorable nor generous, nor strictly honest to conceal even apparent faults. But when faults are out of sight, the seller ought to tell the buyer of them. If he does not, he is a cheat and a downright knave.

Q. *What are the ill effects of lying and deceiving ?*

A. The man who lies, deceives or cheats, loses his reputation. No person will believe him, even when he speaks the truth ; he is shunned as a pest to society.

Falsehood and cheating destroy all confidence between man and man ; they raise jealousies and suspicions among men ; they thus weaken the bands of society and destroy happiness. Besides, cheating often strips people of their property, and makes them poor and wretched.

OF CHARITY AND GIVING ALMS.

Q. *What is charity ?*

A. It signifies giving to the poor, or it is a favorable opinion of men and their actions.

Q. *When and how far is it our duty to give to the poor ?*

A. When others really want what we can spare without material injury to ourselves, it is our duty to give them something to relieve their wants.

Q. *When persons are reduced to want by their own laziness and vices, by drunkenness, gambling and the like, is it a duty to relieve them ?*

A. In general, it is not. The man who gives money and provisions to a lazy, vicious man, becomes a partaker of his guilt. Perhaps it may be right, to give such a man a meal of victuals to keep him from starving, and it is certainly right to feed his wife and family, and make them comfortable.

Q. *Who are the proper objects of charity ?*

A. Persons who are reduced to want by sickness, unavoidable losses by fire, storms at sea or land, drouth or accidents of other kinds. To such persons we are commanded to give; and it is our own interest to be charitable; for we are all liable to misfortunes and may want charity ourselves.

Q. *In what manner should we bestow favors?*

A. We should do it with gentleness and affection; putting on no airs of pride and arrogance. We should also take no pains to publish our charities, but rather to conceal them; for if we boast of our generosity, we discover that we give from mean, selfish motives. Christ commands us, in giving alms, not to let our left hand know what our right hand doeth.

Q. *How can charity be exercised in our opinions of others?*

A. By thinking favorably of them and their actions. Every man has his faults; but charity will not put a harsh construction on another's conduct. It will not charge his conduct to bad views and motives, unless this appears very clear indeed.

OF AVARICE.

Q. *What is avarice?*

A. An excessive desire of possessing wealth.

Q. *Is this commendable?*

A. It is not; but one of the meanest of vices.

Q. *Can an avaricious man be an honest man?*

A. It is hardly possible; for the lust of gain is almost always accompanied with a disposition to take mean and undue advantages of others.

Q. *What effect has avarice upon the heart?*

A. It contracts the heart—narrows the sphere of benevolence—blunts all the fine feelings of sensibility, and sours the mind towards society. An avaricious man, a miser, a niggard, is wrapped up in selfishness, like some worms, which crawl about and eat for some time to fill themselves, then wind themselves up in separate coverings and die.

Q. What injury is done by avarice to society?

A. Avarice gathers together more property, than the owner wants, and keeps it hoarded up, where it does no good. The poor are thus deprived of some business, some means of support; the property gains nothing to the community; and somebody is less happy by means of this hoarding of wealth.

Q. In what proportion does avarice do hurt?

A. In an exact proportion to its power of doing good. The miser's heart grows less, in proportion as his estate grows larger. The more money he has, the more he has people in his power, and the more he grinds the face of the poor. The larger the tree and the more spreading the branches, the more small plants are shaded and robbed of their nourishment.

OF FRUGALITY AND ECONOMY.

Q. What is the distinction between frugality and avarice?

A. Frugality is a prudent saving of property from needless waste. Avarice gathers more and spends less than is necessary.

Q. What is economy?

A. It is frugality in expenses—it is a prudent management of one's estate. It disposes of property for useful purposes without waste.

Q. How far does true economy extend?

A. To the saving of every thing which it is not necessary to spend for comfort and convenience; and the keeping one's expenses within his income or earnings.

Q. What is wastefulness?

A. It is the spending of money for what is not wanted. If a man drinks a dram which is not necessary for him, or buys a cane which he does not want, he wastes his money. He injures himself, as much as if he had thrown away his money.

Q. Is not waste often occasioned by mere negligence?

A. Very often. The man who does not keep his house and barn well covered; who does not keep good fences about his fields; who suffers his farming uten-

sils to lie out in the rain or on the ground; or his cattle to waste manure in the high way, is as much a spendthrift as the tavern haunter, the tipler and the gamester.

Q. Do not careless, slovenly people work harder than the neat and orderly?

A. Much harder. It is more labor to destroy a growth of sturdy weeds, than to pull them up when they first spring from the ground. So the disorders and abuses which grow out of a sloven's carelessness, in time, become almost incurable. Hence such people work like slaves, and to little effect.

OF INDUSTRY.

Q. What is industry?

A. It is a diligent attention to business in our several occupations.

Q. Is labor a curse or a blessing?

A. Hard labor or drudgery is often a curse, by making life toilsome and painful. But constant moderate labor is the greatest of blessings.

Q. Why then do people complain of it?

A. Because they do not know the evils of *not* laboring. Labor keeps the body in health and makes men relish all their enjoyments. "The sleep of the laboring man is sweet," so is his food. He walks cheerful and whiling about his field or his shop, and scarcely knows pain.

The rich and indolent first lose their health for want of action—They turn pale, their bodies are enfeebled, they lose their appetite for food and sleep, they yield out a tasteless life of dullness, without pleasure, and of uselessness to the world.

Q. What are the other good effects of industry?

A. One effect is to procure an estate. Our Creator has kindly united our duty, our interest and happiness for the same labor which makes us healthy and cheerful, gives wealth.

Another good effect of industry is, to keep men from vice. Not all the moral discourses ever delivered to mankind, have so much effect in checking the bad passions of men, in keeping order and peace, and maintain-

moral virtue in society, as *industry*. *Business* is a source of health, of prosperity, of virtue and obedience to law.

To make good subjects and good citizens, the first requisite is to educate every young person, in some kind of business. The possession of millions should not excuse a young man from application to business ; and that parent or guardian who suffers his child or his ward to be bred in idleness, becomes accessory to the vices and disorders of society—He is guilty of “not providing for his household, and is worse than an infidel.”

OF CHEERFULNESS.

Q. Is cheerfulness a virtue ?

A. It doubtless is, and a moral duty to practice it:

Q. Can we be cheerful when we please ?

A. In general it depends much on ourselves. We can often mold, our tempers into a cheerful frame.—We can frequent company and other objects calculated to inspire us with cheerfulness. To indulge an habitual gloominess of mind is weakness and sin.

Q. What are the effects of cheerfulness on ourselves ?

A. Cheerfulness is a great preservative of health, over which it is our duty to watch with care. We have no right to sacrifice our health by the indulgence of a gloomy state of mind. Besides, a cheerful man will do more business, and do it better, than a melancholy one.

Q. What are the effects of cheerfulness on others ?

A. Cheerfulness is readily communicated to others, by which means their happiness is increased. We are all influenced by sympathy, and naturally partake of the joys and sorrows of others.

Q. What effect has melancholy on the heart ?

A. It hardens and benums it—It chills the warm affections of love and friendship, and prevents the exercise of the social passions. A melancholy person's life is all night and winter. It is as unnatural as perpetual darkness and frost.

Q. What shall one do when overwhelmed with grief ?

A. The best method of expelling grief from the mind,

or of quieting its pains, is to change the objects that are about us ; to ride from place to place, and frequent cheerful company. It is our duty so to do, especially when grief sits heavy on the heart.

Q. Is it not right to grieve for the loss of our friends ?

A. It is certainly right ; but we should endeavor to moderate our grief, and not suffer it to impair our health, or to grow into a settled melancholy. The use of grief is to soften the heart and make us better. But when our friends are dead, we can render them no further service. Our duty to them ends, when we commit them to the grave ; but our duty to ourselves, our families and surviving friends, requires that we perform to them the customary offices of life. We should therefore remember our departed friends only to imitate their virtues ; and not to pine away with useless sorrow.

Q. Has not religion a tendency to fill the mind with gloom ?

A. True religion never has this effect. Superstition and false notions of God, often make men gloomy ; but true, rational piety and religion have the contrary effect. They fill the mind with joy and cheerfulness ; and the countenance of a truly pious man should always wear a serene smile.

Q. What has Christ said concerning gloomy Christians ?

A. He has pronounced them hypocrites ; and commanded his followers not to copy their sad countenances and disfigured faces ; but even in their acts of humiliation to “ anoint their heads and wash their feet.” Christ intended by this, that religion does not consist in, nor require a monkish sadness and gravity ; on the other hand, he intimates that such *appearances* of sanctity are generally the marks of hypocrisy. He expressly enjoins upon his followers, marks of cheerfulness. Indeed, the only true ground of perpetual cheerfulness, is, a consciousness of ever having done well, and an assurance of divine favor.
